ACHIEVEMENTS

- ◆ AI/ML Developer Microsoft Student Chapter
- ◆ Runner-Up, Western Command Football Tournament (2023–24)
- ◆ All-Rounder Award (2021–22)
- ◆ Principal's Rolling Trophy (2023–24)
- ◆ Seven Academic Excellence Badges – Army Public School
- ◆ Head Boy – APS (2023–24)

PROFESSIONAL SUMMARY

Motivated B.Tech IT undergraduate (2nd year, MSIT / IP University) with demonstrable experience in front-end development, Python programming, and AI-assisted engineering. Translates academic knowledge into production-level products through startup collaboration and internship experience. Actively pursuing advanced Machine Learning coursework. Seeking opportunities to contribute to technically driven, innovative organisations.

CORE COMPETENCIES

Problem Solving · UI/UX Sensitivity · API Integration · Cross-Functional Collaboration · Agile Workflow · Rapid Prototyping · Data-Driven Thinking · Continuous Learning

PROFESSIONAL EXPERIENCE

Front-End Developer & Integration Engineer

2024 – Present

Stealth-Mode Startup — Mobile Application

- Diagnosed and resolved front-end defects, materially improving stability and UX ahead of launch.
- Engineered front-end ↔ back-end database integration, ensuring consistent and reliable data flow.
- Collaborated with the founding team on iterative feature development, UI refinement, and QA.

Web Development Intern

2024

House of Sports (HOS)

- Designed and developed a user-facing, AI-augmented website applying contemporary front-end practices to deliver a polished digital product.

EDUCATION

B.Tech – Information Technology (2nd Year)

2024 – 2028

Maharaja Surajmal Institute of Technology (MSIT), IP University, New Delhi

Class XII – Science Stream (CBSE)

2024

Army Public School, Dhaula Kuan, New Delhi

KEY PROJECTS

AI-Augmented Website — House of Sports

Designed and deployed a fully functional AI-powered website with emphasis on interface quality, user engagement, and modern front-end practices.

Hostiggo — Community-Driven Travel Platform

Building a full-stack travel platform from the ground up, encompassing React Native mobile development, UI/UX design, SEO strategy, QA test suites, and payment integration (Razorpay / PayU).

Mobile Application (Pre-Launch) — Stealth Startup

Resolved critical front-end defects and implemented database integration within a production-grade mobile application, improving stability ahead of launch.

Python Development Suite — Personal Projects

Range of Python applications spanning data analysis pipelines, GUI tools, and game development prototypes.
